

Mogden Notification

What's happening?

Over the next 3 days we will be carrying out some remedial work to our West Side Odour Control Unit. We will be turning off parts of our odour control system for short periods at a time while the work is being carried out.

How will this affect me?

During this activity residents may experience above average odours.

What are we doing?

We're sorry for the inconvenience this may cause and assure you that every effort is being made to carry out the work in the shortest possible time frame. We expect this work to be completed by the end of the week.

Areas affected

Please see the map below, the red circle highlights the area that is undergoing maintenance.

Mogden Notification

What's happening?

Over the weekend (2 & 3 March) we will be carrying out work which requires the closure of our Combined Heat & Power engines. As a result the gas produced by our process will be burnt off in our flare stack while the work is being carried out.

How will this affect me?

Residents may see the flame emanating from the flare stack during the night, however this is quite normal and controlled.

What are we doing?

We're taking all necessary safety precautions and we're monitoring the process closely from our control room and staff on site. We expect the work to be completed by Sunday 3 March 2019.

Kind regards,
Mogden STW

Mogden Notification

What's happening?

Over the next two days, we will be carrying out enhancement work on our West Side Odour Control Unit. The work being carried out will improve both the reliability and the effectiveness of the unit.

How will this affect me?

During this activity residents may experience above average odours.

What are we doing?

We're sorry for the inconvenience this may cause and assure you that every effort is being made to carry out the work in the shortest possible time frame. We expect this work to be completed by the end of day on 29 January 2019.
